OUR CABINETS

We fabricate our cabinets with the highest attention to detail, focusing on ensuring quality and consistency. We work with our clients to learn how they operate and develop a design that optimizes their cabinets for them and the spaces they're in.

With fully custom cabinets, we don't have to work within increments of 3 inches. We design each cabinet for the optimal use of space with consideration for purpose, hardware, and aesthetics.

With our European style cabinets, we prioritize a 1/8 inch reveal; with our Face Frame cabinets, we prioritize a 3/4 inch reveal. Our

face frames are designed to span multiple cabinets, avoiding large gaps between fronts where two boxes join together.

Fronts can have multiple profiles between the outer edge, inner edge, and flat or raised panels, providing many options to customize a look and bring traditional or contemporary styles into our cabinets.

There are numerous varieties of wood species we can use and even more options of stain and paint, whether they are off the shelf or custom mixed for a particular project.

When it comes to our cabinets, we truly mean we are custom.

DOORS & DRAWERS

We have a variety of profile options for our fronts, including outer edge router profiles, flat panel or raised panel profiles, and inside edge profiles. Our standard doors have lumber stiles and rails, lumber raised panels, plywood flat panels, beadboard, v-board, or, when the cabinets will have a painted finish, an MDF Flat Panel. Our drawer boxes are made with birch plywood, dovetail joinery and undermount soft-close hardware.

WOODS & FINISHES

Whether stain-grade or paint grade, lacquer or conversion varnish, we can create the finish you want for your project. From rustic to clear, closed grain to open grain, off the shelf or custom designed stains and paints, your imagination is the limit to what we can craft.

VISIT OUR SHOWROOM

If you have a cabinet project you're thinking about, we would love to meet with you to discuss what that journey would look like. Our showroom has a variety of material samples that can help the process. Please call us or email us to schedule an appointment.
